

Deep Eligibility Traces

Introduction

This repository consists of implementations of Eligibility Traces and corresponding algorithms in the deep learning setting. Algorithms are implemented in [PyTorch](#) and [Tensorflow 2.0](#) on a range of problems. Custom toy problems are provided in the [MDPs](#) folder.

Trace Algorithms

Following algorithms are available in the current version-

PyTorch

Algorithm	Link	Implementation
TD-lambda		Sutton & Barto, Chapter 12

Tensorflow 2.0

Algorithm	Link	Implementation
TD-lambda		Sutton & Barto, Chapter 12

Custom Environments

Following is the list of custom toy environments-

Environment Name	Link	Implementation
Cyclic MDP	ESAC	link
One-state MDP	Sutton & Barto	link
One-state Gaussian MDP	Sutton & Barto	link

Usage

Notes on running implementations to be updated soon.

Citation

If you find these implementations helpful then please cite the following-
